

Designed to fit in the smallest of spaces...

Bed Head Hoist

Our bed head hoist is the ideal solution for domestic and nursing home environments where a portable hoist wouldn't be safe or practical due to minimal floor space.

Designed to fit into small spaces and modern homes this hoist has a small floorspace footprint and a fixing base for stability which is placed under the bed, out of the way to prevent trip hazards.

The bed head hoist has been developed to fill a gap in the market between mobile hoists and ceiling track/gantry hoists.

The hoist can be quickly assembled and installed into the home with no need for wall or ceiling fixing, when not in the use it can be easily broken down and fits onto a wheeled transport stand for convenience and manoeuvrability.

- ▶ Electrically operated bed head hoist, with four user configurations to adapt effectively to the environment.
- ▶ Freestanding and does not require fixing to walls or other structures
- ▶ Designed to assist transfers from bed to chair, wheelchair or commode.
- ▶ Particularly useful for areas where space is limited.
- ▶ Can be used on uneven floors and with drawer line divans
- ▶ 0-180° arc of movement
- ▶ Maximum user weight up to 152kg (24st)

Product Code: HST13

Height: 204.8cm (floor to top of boom)

Width: 202cm overall (283.5cm with extra long leg configuration for 180° swing)

Length: 197.5cm

Product Weight: 50kg (62kg on transport stand)
