Minimising the risk of fall and potential harm

Icon Floor & Icon Floor Plus

Minimising the risk of fall and potential harm

The electronically controlled Icon Floor bed range is designed specifically with the occupant in mind, combining quality construction and functionality to assist with care, as well as minimising the risk to the occupant of falling and causing injury by using the low height function.

The stylish bed has additional features including backrest, leg-lift and an overall bed height adjustable from 10cm to 70cm to further aid mobility and care.

Using a combination of these functions, the Icon Floor range can also be placed into a comfortable profiling position for daily activities such as watching television or interacting with visitors making it the perfect profiling bed for multiple care environments including home, residential and nursing care.

Icon Floor Plus
