## Features:

- » The Alpalite is a four section electrically profiling community bed, designed and manufactured by our bed experts in Halifax, UK.
- » Quick and simple assembly, designed for single person installation.
- » All sections of the bed are below 25kg for safe manual handling and simple assembly.
- » Slatted bed platform for easy cleaning, improved infection control and durability.
- » The auto regressing backrest increases the space in the pelvic area by sliding the backrest backwards to an additional degree as it is raised.
- » Cardiac chair function helps to maximise the sitting position. It enhances patient comfort, promotes independence and assists with early mobilisation activities.
- » Includes Reverse Trendelenburg function that is a foot down position, placing the body on an incline with the head being elevated above the feet.
- » Patented integral full length side rails designed with a stepped down section for easy patient egress and ingress.
- » Intuitive and easy-to-use 9 button handset. The lightweight handset can be locked-out to ensure vulnerable users safety.
- » Available in standard and low height options.
- » 5-year warranty as standard.
- » Full compliance to EN60601-2-52 and EN60601-1-11.

## Accessories:

- » Can accommodate taller patients with an optional bed extension, which is quick and easy to install.
- » A range of optional side rails are available.
- » IV/lifting pole socket is available as an accessory.
- » Full range of supporting accessories and spare parts are available.

Bed extension
