

Wave

The fully electric profiling shower trolley

The Wave Shower Trolley features fully electric platform profiling – you can optimise the position of the user at the touch of a button.

250kg
MAX
USER WEIGHT

The handset also controls the height adjustment and allows platform tilt both in Trendelenburg and anti-Trendelenburg directions.

A favourite feature of the Wave is the generous platform width, measuring 1900mm x 650mm internally (2130mm x 810mm external), which will accommodate most users. You can safely lock all castors from one pedal, which gives excellent stability to this sturdy trolley even when working close to its 250kg weight capacity.

The Wave trolley is a premium solution for bathing in multi-user environments, yet designed to look good in the home.

- Electrically adjust the height using a handset or the foot pedal
- Individual-braking with 150mm diameter castors
