

Coral

Versatile,
height adjustable
shower trolleys

Coral Standard

A versatile trolley with a safe working load of 200kg and 250kg for the Coral Maxi. Both are available in a choice of either hydraulic or electrical height adjustment.

There are many features across both models such as central braking and safety siderails plus a stable platform with a padded mattress, plug and drainage hose.

The Coral is supplied with a fixed angle platform, which is angled just 3 degrees to allow effective drainage while the Coral Maxi has a generous 900mm platform width to provide a great surface for rolling and bathing.

Both models feature a strong liner with high sides for additional protection, and with inbuilt channels to help the flow of water.

The frame is of steel construction with an antibacterial hard wearing paint finish, whilst the siderails are constructed of stainless steel.

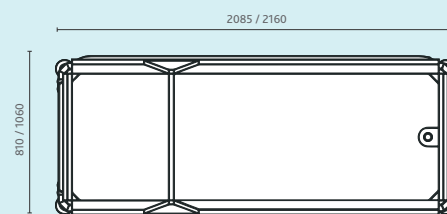

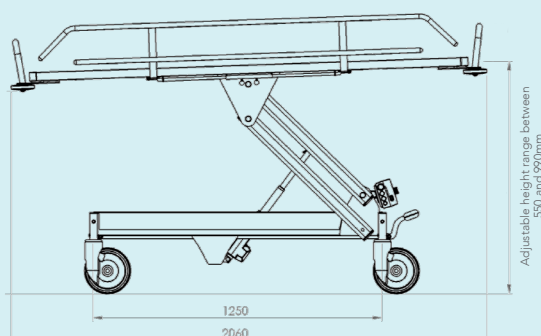

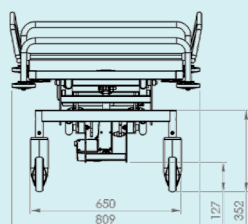

The Coral shower trolley is suitable for use in multi-user environments, as well as looking great in the home setting.

Coral Maxi
